➤ CHALLENGE

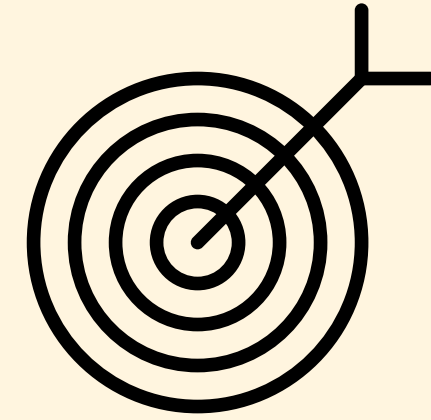

1. CONTEXT AND PROBLEM

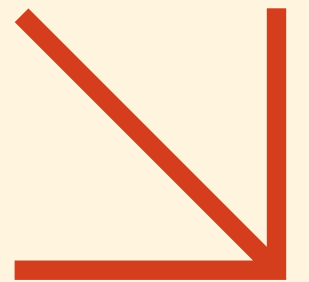

Artificial intelligence is rapidly transforming the way people think, behave, and interact, often in ways that are not fully understood or controlled. From influencing decision-making through algorithmic recommendations to shaping social perceptions and mental well-being, AI systems can create unintended psychological, social, and ethical consequences. These effects include over-reliance on automated systems, reduced critical thinking, bias reinforcement, and the spread of misinformation.

2. CHALLENGE:

The challenge is to design innovative solutions that mitigate the negative impacts of AI on individuals while preserving its benefits by promoting transparency, user awareness, ethical safeguards, and human-centered design. How can we build systems or tools that empower people to remain informed, autonomous, and resilient in an AI-driven world?

3.EVALUATION CRITERIA

1. PROBLEM & SOLUTION CLARITY (25%)

- Is the problem well understood?
- Is the solution clear and useful?
- Does it make sense for real users?

2. CODE QUALITY & FUNCTIONALITY (30%)

- Is the code clean, organized, and well-structured?
- Does the prototype/demo work correctly?

3. FEASIBILITY (15%)

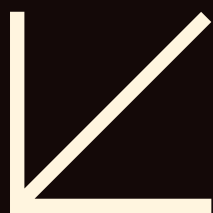

- Can this realistically be built and used in real life?
- Includes technical feasibility (tools, scalability, implementation)

4. CREATIVITY (15%)

- Is the idea original or interesting?

5. PRESENTATION (15%)

- Is the idea explained clearly and simply?

4. RULES

1. Respect & Collaboration

- Be respectful to all participants and organizers.
- No plagiarism or cheating.

2. Original Work

- All work must be created during the hackathon.
- You may use existing libraries, APIs, or frameworks, but not pre-built full solutions.

3. Fair Use of AI & Tools

- AI tools are allowed, but participants must understand and be able to explain their code.

4. Time Limit & Submission Deadline

- All work must be completed within the official hackathon duration.
- Projects must be submitted as a .zip file on the hackathon platform before 7:00 AM.
- Any submission after this time will not be accepted.

5. Submission Requirements

- Teams must submit:
 - * A working prototype/demo
 - * Source code
 - * A short explanation or presentation

6. Code Ownership

- Teams keep ownership of their projects unless stated otherwise.

7. Judging

- Projects will be evaluated based on the provided criteria.
- Judges' decisions are final.

GOOD LUCK!

we can't wait to see your
ideas!
